**Subject:** Quick update on today's round table!

We just finished the 4 hour round table in Yerington. Here is a quick update:

Good exchange of information and productive dialogue;

Met round table goals:

1. Laid out the range of stakeholder concerns
2. Answer some of the questions raised
3. Provided an action plan for moving forward including another round table.

All primary stakeholder groups were represented except the Agriculture industry.

The hot button discussion topics were:

1. Approach to ensuring CERCLA protective cleanup.
2. Yerington Paiute Tribe raised tough questions about concurrence vs acceptance and their role in promulgating tribal regulations that may be ARARs.
3. General community involvement and request for a community involvement plan before deferral.
4. Ensuring creation of local jobs and preferential treatment to tribe members and Yerington residents.

EPA's follow up:

1. Set up meeting between EPA and YPT--including our legal folks to discuss tribal "rights" prior to and under deferral.

Please let me know if you have any questions.
